Slate Presentation

Ipads for Educators—Increasing Productivity

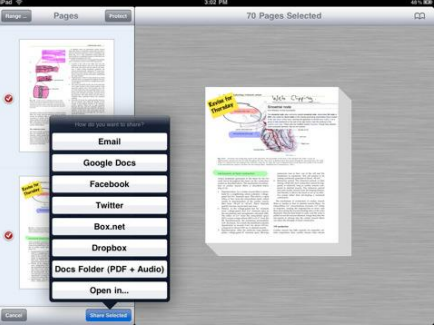

Growing in popularity every day, the ipad is a must-have tool. It is important to truly understand how the ipad can increase your effectiveness and enhance your creativity. You will learn to use the ipad to manage your existing workload, including using the ipad as a replacement for a laptop.

The key to increasing your productivity is to limit the number of places where your information appears and to organize well. If you create a document on the ipad, you can use google docs to store it. By having an online project management app, you can create “to do” lists from anywhere.

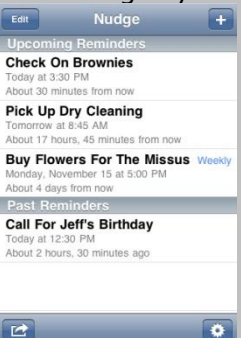

Evernote	<p>Save your ideas, things you like, things you hear, and things you see, like a digital file cabinet. Your data is synched wirelessly between the iPad and any other computers and devices on which you have Evernote installed (PC, Mac, iPhone, BlackBerry, Android, Windows Phone, web, and more)</p> <p>You can email text, photos, and files (as attachments) into Evernote, and email them from Evernote to any address.</p> 	Free
NoteAbility	A note-taking app that allows you to type, insert a figure, and insert a web clip or a picture. It also allows you to record a teacher’s lecture.	2.99

	 <p>RECORD EVERYTHING</p> <ul style="list-style-type: none"> Audio recordings link to notes Photos from iPad 2 camera Aa Multiple fonts per note Text dynamically wraps around pictures <p>NOTABILITY</p>	
--	--	--

Noterize

 <p>Noterize allows PDFs, images, handwriting and typed text all on the same page. PDFs are searchable as well as all typed text</p>	<p>Free</p>
--	-------------

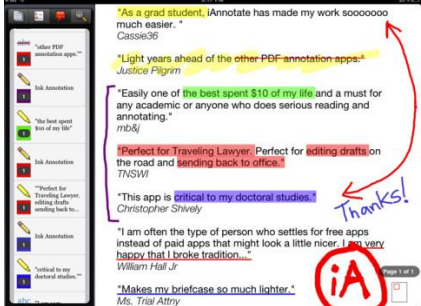

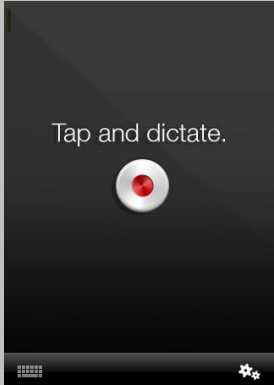

Nudge

<p>s a quick note to remember something for tomorrow: bring pens to school, tye dying bring in a white shirt. It is set and until you shut it off it Nudges you</p> 	<p>.99</p>
---	------------

IAnnotate PDF

An annotation tool for PDF files. Lets you save your place too.

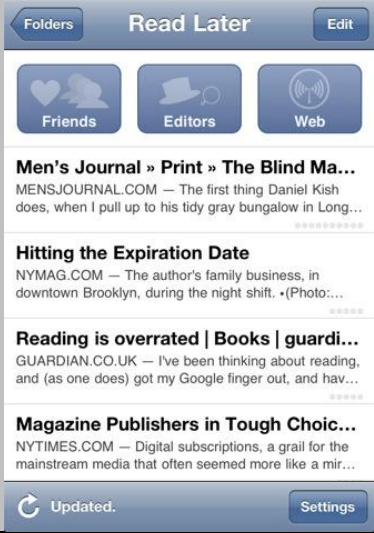

9.99

		
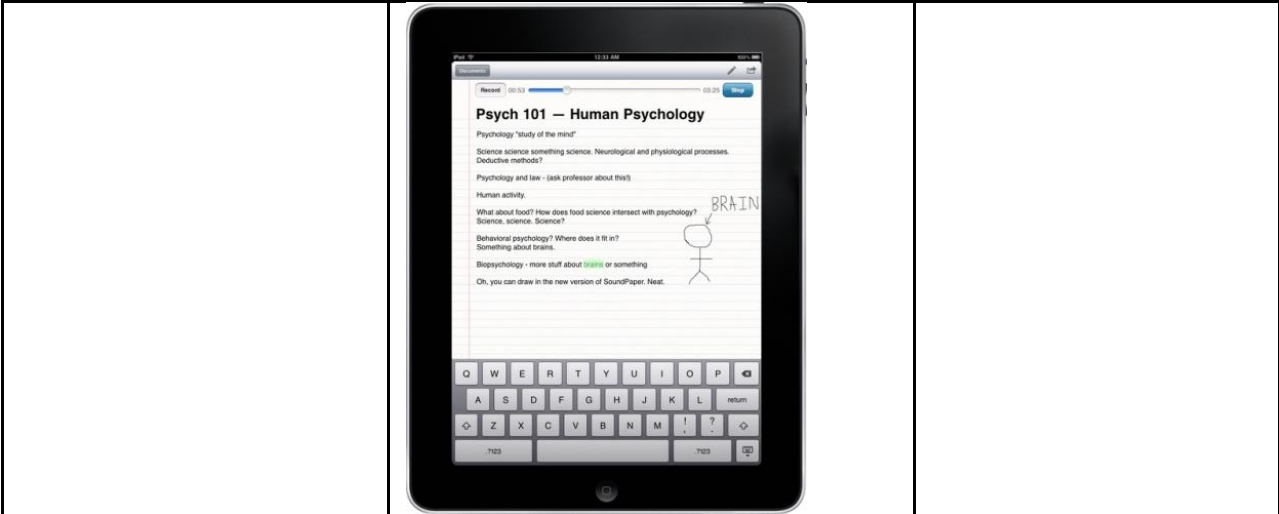

<p>Dragon Dictation</p>	<p>an easy-to-use voice recognition application powered by Dragon® NaturallySpeaking® that allows you to easily speak and instantly see your text or email message.</p> 	<p>Free</p>

	<p>Keynote, Word, Excel, Outlook, Quicken, IE, Firefox, Safari, World of Warcraft, and other PC / MAC applications</p> <p>Access your PC or MAC programs, games, multimedia content, and files over Wi-Fi and 3G/4G networks. Go everywhere with just your iPad without having to carry your computer!</p>	
Common Core Standards	A great reference for students, parents, and teachers to easily read and understand the core standards. Quickly find standards by subject, grade, and subject category (domain/cluster). This app includes Math standards K-12 and Language Arts standards K-12. Math	Free
The Teacher's Assistant	If your classroom features computers, it is often important to monitor what students are doing in order to maximize productivity. This free application lets teachers transmit messages to students from the iPad to their computers. You can also use this app to limit their access to the Internet, and blank out their screens if necessary.	5.99
iResponse	If your classroom is particularly high-tech, and every student has an iPod touch, iPhone, or iPad, you can use this app to send questions to each student. Once they answer, you can compare each response to the correct one, and create a graph of all the answers submitted. This makes for an interactive learning environment that is sure to keep students more engaged than usual.	.99
TED	See transformational videos	Free

<p>The Weather Channel</p>		<p>Free</p>
<p>Instapaper</p>	<p>A simple tool to save web pages for reading later. Great for when you are surfing the web or using hootsuite and you find a great article to read but don't have time now.</p> 	<p>4.99</p>
<p>Soundpaper</p>	<p>Allows you to take notes and record voice at the same time. Tap on a word and will take you to that part of the recording for playback.</p>	<p>4.99</p>

iTalk

Voice Recorder

Free

GoodReader

GoodReader® is the super-robust PDF reader for iPad

support PDF directly. An application must follow these steps:

1. Insert procedure acts containing the PDF operations.
2. Extract the content for each page portion of a traditional PostScript such as m for moveto and l for line.
3. Decode compressed text; graphics filters used in PDF are compressed or may not be supported, depending on device.
4. Insert any resources, such as fonts or images. Fonts may be embedded in the PDF file. Fonts may be embedded in the PDF file. Fonts may be embedded in the PDF file.
5. Put the information in the program that fully represents the document.
6. Transmit the PostScript program to the output device.

Draw Directly on a PDF page with your finger

Draw Rectangles

Ovals

Lines & Arrows

Highlight Underline Crossout

Print with typewriter

This is a popup "sticky note"

You will see every PDF annotation on your computer in a general PDF reading program

Share your notes and drawings with your colleagues via Email

4.99

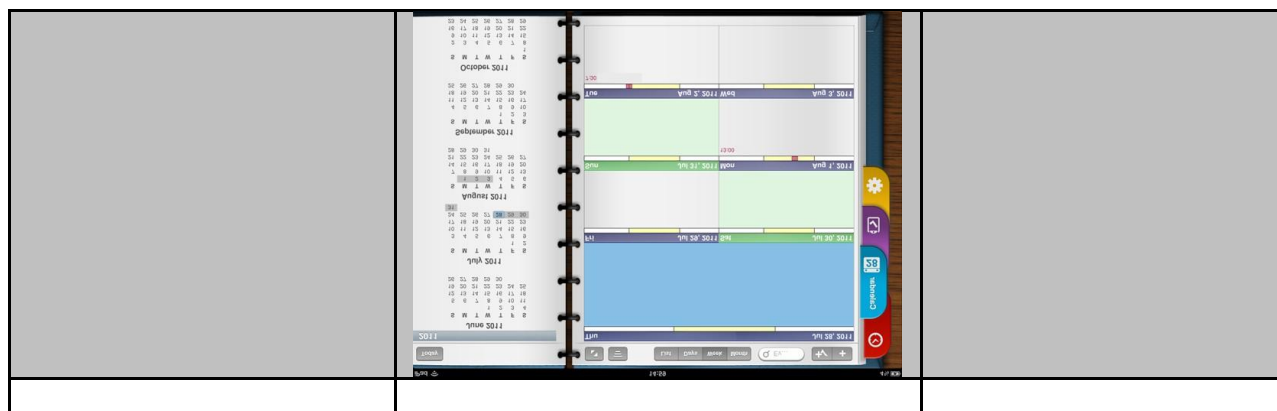

Toontastic

a Creative Learning tool that empowers kids to draw, animate, and share their own cartoons through imaginative play.

1.99

Ipad Tips

1. The "Hidden" Apostrophe

If you're in Notes, Pages, or just writing an email, it's often time consuming (and slightly annoying) to locate the apostrophe. Usually, you have to tap the {.'123} button to go to the second screen of the keyboard. But did you know you can just hold the {!} key and a hidden apostrophe option will appear? It's simple to just slide your little finger across it...and voila!

2. Create Folders

Get organized! You can easily create a folder to help organize your apps. Simply tap and hold on any app until it does the "jiggle dance." Then drag that app over another app icon that you wish to share a folder and then release. A folder will be created with those two apps, and you can add additional apps. The folder name will be based on the category of apps it contains, but you can always change it.

3. Control Notifications

"Would you like to receive push notifications from XYZ game?" If you've ever accidentally said "yes" to this question then you know how annoying notifications can be! Good news is you can control them. Simply go to Settings, Notifications, and you can set alerts and sounds!

4. Quick Mute

Playing a game as your students walk into the class? Quick! Mute your iPad! I know...this would never happen...teachers don't play games on their iPads between classes (he he). When iPad first launched there was no way to quickly mute the device. Now, however, just press and hold the Volume-Down button.

5. Screen Shots

It's easy to take a screen shot of your iPad. Simply press the Home button and then the Sleep/Wake button. You'll hear the click, your screen will flash, and your new screen shot will be saved in your Photos.

6. Street View in Maps

You may know and love Street View while viewing Google Maps on your computer, but it's not as obvious how to access this on your iPad. The trick is to drop a red pin first then tap on the icon of the person to enter Street View.

HINT: When you perform a search, a red pin is automatically dropped in that location.

7. Clear Browsing History

On our computers it's easy to locate the "clear history" options in our browsers. We're trained to do it from within the browser itself. On the iPad, however, to clear Safari browser go into Settings then click on Safari. You'll see three options to clear history, cookies, and cache.
